

# TELEVISA SELECTED CLAYTON STEAM GENERATORS FOR MAXIMUM SAFETY, ENVIRONMENTAL PROTECTION AND EFFICIENCY

## CASE HISTORY

**Televisa** the most important media conglomerate Latin America was founded in 1950, transmitting at a Radio Station - XEW "The voice of Latin America since Mexico".

The same year their facilities called "Televiscentro" were inaugurated to begin activities as the newest communication media.

This important televise media grew quickly as well as their personnel and hired artists in all their areas. Then, arose the necessity to have their own laundry service, ironing and kitchen for 800 people dining room, working 24 hours a day.

Televisa selected Clayton among diverse options considering the best technology, fast and safety operation . So, installed their first two 60 BHP Clayton Steam Generators in their facilities of Chapultepec. Av., Mexico City .

# TELEVISA SELECTED CLAYTON STEAM GENERATORS FOR MAXIMUM SAFETY, ENVIRONMENTAL PROTECTION AND EFFICIENCY

## CASE HISTORY

The great satisfaction obtained with Clayton were verified when in 2005 due to bigger steam and hot water demand and in order to observe the new environmental norms of the City, were again selected two 100 BHP Steam Generators to substitute the old units.

As Televisa wanted to have the same kind of modern services in their new facilities in San Angel, Mexico City, they consult again to ClayMex for a new a turnkey project considering other two 100 BHP Steam Generators including interconnection with their service net.

This way, Televisa continues keeping up to date services installing modern equipment and systems of vanguard technology to satisfy their requirements with great efficiency and fulfilling environmental and safety effective rules.
